WHAT WE DO

Core Competencies

Hybrid Data Intelligence Platform

Microsoft-native governed AI for regulated buyers. Hybrid query engine routes business questions to SQL for precision or RAG for semantic search — every response cited to a specific source row or document. Reference architecture on Azure OpenAI, M365, SharePoint/OneDrive, and Copilot Studio.

IT Professional Services

Skilled technical personnel and staff augmentation for mission-critical government and enterprise programs. Program management, systems engineering, and technical operations.

Cybersecurity & Compliance

End-to-end cybersecurity support aligned with NIST, CMMC, and federal compliance frameworks. CMMC readiness, RMF support, security controls implementation, continuous monitoring.

Cloud & Infrastructure

Modern cloud architecture design, migration planning, and ongoing infrastructure management. FedRAMP-aligned deployments, DevSecOps implementation, hybrid and multi-cloud.

Program Support

Program management and administrative support for government agencies and prime contractors. Contract management, budget analysis, schedule and risk management.

WHY CSG

Differentiators

- Microsoft-native delivery posture. Reference architecture deploys on Azure OpenAI, M365, SharePoint/OneDrive, and Copilot Studio — aligned to existing federal and enterprise Microsoft tenancy, including Azure Government, GCC, and GCC High where required.
- Senior-led delivery, not pyramid staffing. Engagements staffed with experienced practitioners holding workstream lead accountability — not layers of management overhead. Documentation-first execution.
- Production AI experience, not pilot. Past performance includes first-of-kind Microsoft Copilot Studio and Azure AI Foundry deployments at Fortune 500 production scale, plus five integrated AI/ML use cases on a global D365 training program (active 2026).
- Security-first delivery alignment. Compliance-aware documentation from the outset. NIST and CMMC alignment. Built for procurement-aware buyers including federal civilian and California SLED.
- Multi-frontier hedge. Anthropic Service Partner application planned 2026 Q4 — adds Claude API as a frontier-model option alongside Microsoft-native, without forcing additional cloud build-out.

PAST PERFORMANCE

Senior-Led Delivery on Enterprise-Scale Engagements

Attribution: Cornerstone Systems Group was formed January 5, 2026. Engagements below reflect founder past performance — performed by CSG senior leadership at prior firms prior to or concurrent with founding CSG. Standard B2B and federal Sources Sought attribution framing for key-personnel past performance. Client identities and personnel credentials available to qualified prospects under appropriate non-disclosure agreement.

Enterprise Dynamics 365 SCM Implementation with Embedded AI/ML

Fortune 500 agricultural equipment manufacturer · 2024–2025 (18 months)
12-person implementation team · multi-site dealer rollout · Supply Chain Architecture workstream lead

Outcomes: 24 dealerships online with real-time inventory feeds · 1M+ SKUs migrated · 100+ users trained · 30% reduction in month-end financial close time · first-of-kind Copilot Studio + Azure AI Foundry integration at production scale.

Ground-to-Cloud D365 Upgrade + Advanced Warehouse Management

Mid-market consumer watersports brand portfolio · international manufacturing · 2023–2024
6-person team · two-phase enterprise modernization · Supply Chain Architecture workstream lead

Outcomes: On-premises AX → cloud F&O migration handling legacy customization, data, and process complexity · Phase 2 AWM deployment with mobile scanner and label printer enablement · pick-and-pack labor time reduction · inventory accuracy at industry-leading levels.

AI-Augmented Global D365 Training Program (Active)

Global industrial fastener and assembly solutions provider · multi-legal-entity · 2026 active
15-person team · 10 D365 F&O modules · 5 integrated AI/ML use cases · Lead Supply Chain Architect

Outcomes: Production-scale multi-use-case generative AI deployment (beyond pilot) · substantial reduction in content authoring time · localization cost reduction · faster time-to-deploy across new geographies via integrated Copilot Studio + Azure AI Foundry pipeline.

GOVERNMENT ACQUISITION

Contract Vehicle Pursuit Posture

SAM.gov Registration	In Progress · UEI/CAGE pending issuance
Small Business Designation	Pending · gated on SAM Active
GSA Multiple Award Schedule (MAS)	2028 Q1 Pursuit Posture
OASIS+ Small Business Pool	2028–2029 solicitation horizon
California SLED (Cal eProcure / CMAS)	Planned · post-SAM Active

Secondary NAICS: 541511 (Custom Computer Programming) · 541519 (Other Computer Related Services) · 541611 (Admin & General Management Consulting) · 541618 (Other Management Consulting) · 541614 (Process, Physical Distribution & Logistics Consulting) · 611420 (Computer Training) · 518210 (Computing Infrastructure Providers & Data Processing).
